Hines Interests	University of Houston
Home Depot	UPS
Iron Mountain Storage	Weingarten Realty

## Customer Views on Urettek ICR

"I want to ... extend our appreciation of the calibre of work you have provided. With your aid, we were able to avoid cutting and removing slab on grade construction to support new interior block walls. Under contract you have provided excellent services and have demonstrated adaptability and professionalism. Your service is prompt, your workers always courteous and well equipped on site. Keep up the good work!"

**Maple Engineering & Construction**

"I would like to thank you and your crew for solving what would have otherwise been a big fix! The floor had dropped away a good inch in the corner as was the customer side, front door. I could have had to remove the floors and replace them, stopping operations during the project. This looked almost undoable! Contacting your team turned the project from "out" of the park to a "walk" in the park. From "one week" and many man hours to "one morning" was nothing shy of incredible! All finished and completely clean and ready for business as usual before the store opened. The cost to our customer was not only cut, but considerably ground down to a fraction of the initial anticipated cost."

**Centreline Construction – KCF Repair**

"Rarely during the fifty years that we have been in business, have we had the pleasure of dealing with a firm of such integrity as URETEK. The work contracted was done promptly and without any inconvenience to the Bank or its customers. Within days of your follow-up call to enquire whether we were satisfied, our few minor complaints were rectified. I must add that had we accepted another quote that entailed the cutting and removing of the sunken concrete and then pouring it anew, we would have paid nearly three times as much. Thank you for being so frank and honest with us."

**Karstaedt Enterprises, Royal Bank**

"We were greatly pleased with the fine workmanship and final product that we have received. The raising of the slab for our detached garage and also a section of the entry walk was completed most professionally. The pleasantness of your crew and the exemplary behaviour of your staff was noted and appreciated. It is our feeling that the URETEK slab-lifting system used is a much superior product when compared to standard mud-jacking and compares most favourably in price. "
